

CHAPTER 11
Of
SAYONARA PLANET EARTH
BY
VINCENT GILVARRY

Now that he has an idea with distinct possibilities, Addric reports back to Lila Vectrona at Intergalactic headquarters.

‘That was inspired brilliance Addric, to call upon the services of the Krugwah.’

‘It was their idea, not mine.’

‘Of course, but from now on, you will require the assistance of experts in a rarefied field.’

‘I think it would be a good idea if you made the acquaintance of two interesting women, Majura Krestovori and Seray Antropedes.’

‘They are the Venusian Ambassadors to the Intergalactic Alliance and hold positions of responsibility as joint controllers of the celestial body known as The Department of Universal Intelligence.’

Addric has never met a Venusian before, and Majura and Seray are something of a surprise. They are at least seven feet tall and if they do have spherical heads and bulbous eyes, it’s not obvious.

But they are very exotic creatures, nevertheless, adorned like ethereal spirits in gossamer pink gowns.

‘We thought that rose was an appropriate colour for this occasion, considering the fact that over four billion Earthlings saw a flower in their dreams last night,’ Seray says.

‘And of course, every social media network is madly trying to analyse the meaning of that phenomenon,’ Majura says.

‘This department is an arm of the Intergalactic Alliance,’ Majura says. ‘And it is our job to monitor the level of activity in the consciousness of all life forms in the Solar System.’

‘But in the case of Planet Earth, it’s the decreasing level of activity.’

‘Congratulations Addric, that really was a brilliant idea, and according to our data, it was a resounding success.’

‘But Majura, did it have any effect on the consciousness of the people of Earth?’

‘Yes, it appeared as a sharp spike on the graph, which means that it did not go un-noticed.’

‘Unfortunately, over the last few hours, the people of Earth have reverted to type.’

‘What does that mean?’

‘Most Earthlings are so brainwashed by technology that to experience something of a non-electronic nature is almost un-natural.’

‘So, they have forgotten about it?’

‘Not yet Addric, but anything is possible on Earth.’

‘However, we have prepared a presentation that you might find interesting. It is freely available from the Quantum field by the way.’

“And that means what,” he says.

‘That is the means by which we judge the potential of human consciousness.’

‘Potential is everything in a Quantum state, but it is also the barometer by which we assess what may or may not happen.’

‘And quantum means what?’ Addric says.

‘Quantum, to quote our dear friend Kryon, the Magnetic Master, is a non-physical state, the soup of energy that surrounds everything in the known universe.’

‘Human beings are programmed to think in a linear and logical fashion, but linearity does not exist in a Quantum state and this is the problem.’

‘Earthlings have become so used to linearity that they are baffled when something unusual happens.’

‘When confronted by the idea that synchronicity, or magic, for want of a better word actually exists, frustration and disbelief rear their ugly heads.’

‘This is the battle that you face Addric, how to break that spell and allow the people of Earth to understand that they are more than what they know.’

‘But if we were to conduct another campaign like that Majura, things could get even worse, even if it is harmless.’

‘Anything you do is going to have an effect, Addric. But once something becomes a reality, it cannot be reversed. That is the nature of things.’

‘Once they have experienced something new, the people of Earth cannot return to their old ways of thinking. And it is through your efforts that they will come to realise that.’

‘But if I were you, I would not keep this campaign a secret for much longer. It would be a good idea to bring it out into the open as soon as possible.’

‘If the Earth is to survive, it will only do so through the conscious intent of over seven billion people who receive the same message at the same time.

‘Otherwise, theirs will be a fate too horrible to imagine. And if anyone can give them hope, it is you Addric.’

‘However, I am in possession of a vital piece of information, and one that you can use to your advantage.’

‘And what is that Majura?’

‘One of the leading players in the electronics industry is about to give you a helping hand.’

‘Listen carefully and I will tell you everything I know.’
